

ASTM INTERNATIONAL CONFERENCE ON ADDITIVE MANUFACTURING

Research To Application Through Standardization

October 31 – November 4, 2022 | Orlando, FL
JW Marriott Orlando Bonnet Creek Resort & Spa

Submit an Abstract at www.amcoe.org/icam2022

Economics and Sustainability of AM

In a relatively short time, additive manufacturing has developed from a prototyping tool to an industrial-scale manufacturing platform. Alongside this growth, and broader technology developments, there has been increasing importance and significant progress in the areas of sustainability and economics.

The Economics and Sustainability of AM symposium will provide context to these essential topics:

- AM in the circular economy: linking material, design, manufacturing, product, and end-of-life
- Value analysis and life cycle assessments of AM materials and processes
- Reuse and recycling practices in AM
- Impact of AM on supply chain and logistics

Symposium Organizers

- Olaf Diegel, University of Auckland, New Zealand
- Gary Ng, ARTC A*Star, Singapore
- Behrang Poorganji, University of Toledo, USA
- Nicholas Sabo, GE Additive, USA
