

ASTM METAL PBF-LB MACHINE OPERATOR CERTIFICATE

01

Operators Sign Up for Certification

Operators using PBF – LB machines sign up for certification either through the OEM’s portal or directly to ASTM

02

Operators Trained by Machine OEM

Operators can be trained by the OEM with their basic machine training including topics mentioned in the standard. After the training, operators must have performed at least 5 builds before pursuing certification.

03

Theoretical Assessment – Conducted Online by ASTM

ASTM will conduct the theoretical assessment through its online platform prior to the practical assessment based on the topics mentioned in the standard.

04

Practical Assessment – Conducted On-Site by ASTM

ASTM will conduct the practical assessment on-site. This could be at the customer site or at the OEM facility.

05

Certification

Upon the successful completion of the assessments, ASTM certifies the operator against the ISO/ASTM 52942 standard and provides a certificate and digital badge. The certificate is valid for a period of 2 years.
