

ADDITIVE MANUFACTURING QUALITY (AMQ) CERTIFICATION PROGRAM

ASTM Certified Additive Manufacturer

CENTER of
EXCELLENCE
Research to Standards

- 01 REGISTRATION** → ASTM/SEI announces the program and interested manufactures or service bureaus can apply. SEI, an affiliate of ASTM, manages the certification and contracting.
- 02 GAP ANALYSIS/PRE-AUDIT** → Analyze the current status of current quality management system and associated documents and point out what is missing
- 03 FINAL AUDIT** → An auditor assigned by ASTM audits all process specific documents as per the certification scheme. This could include documents such as manufacturing plan, material quality control document, process control document etc.
- 04 REPORTING THE AUDIT RESULTS** → A detailed report covering the results from the audit team will be send to the manufacturer/service bureau. The report will also detail if any non-conformity exist.
- 05 CERTIFICATION DECISION** → Upon successful completion of the audit, ASTM will issue the certificate stating that the manufacturer/ service bureau complies with the specified requirements.
- 06 MAINTENANCE OF CERTIFICATION STATUS** → Annual surveillance audits to maintain the certification status.
