

ICAM26

ORLANDO, FL
SEPTEMBER 28 -
OCTOBER 2, 2026

International Conference on Advanced Manufacturing

Research to Application through
Standardization

Value Chain: Advanced Topics in AM: Qualification, New Materials, Post- Processing, and Innovation

amcoe.org/icam2026

SYMPOSIUM CO-ORGANIZERS

Chad Beamer
Quintus Technologies, USA

Cory Cunningham
Boeing, USA

Nicholas Derimow
NIST, USA

Colton Katsarelis
NASA - Marshall Space Flight Center, USA

Elena Lopez
Fraunhofer IWS, Germany

Graham Matheson
Oerlikon AM, Germany

Cecilia Persson
Uppsala University, Sweden

Tiago Silva
University of Porto, Portugal

ASTM STAFF CONTACT

Aloysius Tay
ASTM International

Additive manufacturing (AM) facilitates the establishment of rapid qualification and certification of processes, materials, and components. This symposium offers a forum for discussion of the pathway from traditional to rapid qualification and certification, as well as development of new materials, post-processing techniques for AM, and other innovations such as new AM processes or applications.

Topics of interest include but are not limited to:

- Traditional and rapid qualification and certification of AM technologies, personnel, materials, facilities, and components
- New materials development (e.g., combinatorial efforts, etc.) focused on printed material, not feedstock (see AM Feedstock Symposium)
- Post-process optimization (e.g., powder removal, support removal, heat treatment, surface treatment, etc.)
